

# Shuzan Technology Services LLP

## Our Endeavors:

One of our major projects was the mobile application development for Bidvest McCarthy app, which we delivered only in a period of six months.

## Bidvest Club McCarthy

McCarthy is a leading multi brand automotive dealership of new & used cars in South Africa & Bidvest Automotive is one of South Africa's largest and most respected motor retailers, with a strong history in mobility solutions.

Together for their customers they offer all in one service app called as the 'Bidvest Club McCarthy app'

Which offers various services such as

- Vehicle breakdown
  - o services (Accident towing, Breakdown tow, jump start, need fuel, Flat tyre & Locksmith for key lost cases)
- Get Home Safe
  - o Get a driver at your location and drive you home safely.
- Book your vehicle for service.
- Home assistance services
  - o Plumbing
  - o Electrical
  - o Broken Glass
  - o Locksmith.

Claimtec is a local software company from South Africa who helped us by outsourcing the project to Shuzan Technology Services LLP.

## National Youth Database & LMS Solution

The Learnership management system is another flagship projects

Learnerships are occupational and vocational education training programs that have been provided to fast-track acquisition of qualifications for unemployed youth, equipping them with knowledge, skills and experience.

There are major factors affecting the retention of the learners. Their experiences of learnership programs and the total effectiveness of the current solutions available.

Most Academies, BEE Consultants and SITA focus only on the Training part of the programs and the actual work experience part of the programs is neglected.

This has created millions of youths that sits with qualifications that is completely useless as the learners have never experienced any practical work of what they have studied.

Connect Me want to change this at the core of the industry by establishing itself through technology.

### **The Solution:**

- Connect Me required a learning management system or learner tracking system that will revolutionize the Learnership, ETI and Youth Development processes in South Africa.
- Our aim is to become the go to for all Learnership Academies, BEE Auditors, SITA's and all Unemployed Youth.
- By owning the main solution that both links Youth, Academies and Potential Employers on a national level.
- A solution that can be broken into multiple parts and licensed, White-label and monetized throughout its functions

## **RE-DESIGN AND IMPROVISE THE PROPLEADS WEBSITE**

This is one of the small B2B requirement where the site owner himself is a developer and needed assistance in overall performance improvements and cloud deployments help on AWS.

- Redesign the front end.
- Replace the buttons with icons.
- Make the page responsive.
- Fix Chrome Driver
- Write test scripts for backend

PropLeads offers leads generation, canvassing, CRM and workflow - all in one package, and is a must to have for professional real estate agents in South Africa!

This website you to find more leads and to keep all your information in one place at your fingertips! Our aim is to assist you the estate agent, starting with Leads Generation, all the way to signing the deal. We provide the necessary information at the right time, reduce your admin burden, and tie together all the multitude of things you must do to sign the deal.

## **Trafico**

Client requirements:

1. Deploying the app on Azure Cloud with CI/ CD pipelining and backup for disaster recovery.
2. Designing the UI part and working on REST API to integrate with DB and building WhatsApp integration
3. Building a REST API to Implement Email and Internal chat.

The website was developed 12 years ago with the older technologies and the challenge was to migrate this hefty code to an all-new framework.

Trafico is a leading Traffic Fine and Vehicle Licensing Partner, supplying uncompromised, high-quality work to individuals, businesses and corporate companies in all nine provinces of South Africa since 2014.

### **Traffic Fines**

- Reduction & Recission of fines
- Redirection & Nominations
- National & AARTO fine enquiries
- Validity audits on fines
- Manage upcoming court dates

### **Vehicle Licensing**

- Renewals & Reprints (ALV)
- Change of Ownership (NCO)
- Registration & Deregistration (RLV)
- Roadworthy & Renewal Notification
- BRNC Application & Changes

### **Web App**

- Manage Vehicles & Related Info
- Manage Proxies, Reps & Drivers
- View Fines
- Monitor Transactions
- Access Comprehensive Reports

## Stock Sync App

Client requirements:

To Design & Develop Stock Sync Web Based Application which will sync the data

between wholesalers and the online stores. This will help to synchronize the new stocks directly on the client website which are built on shopify.com or Wix.

Deliverable:

Design & develop a data syncing app between the wholesale goods suppliers and the Web based applications.

- The syncing app should accept the data as multiple file types from various different locations as indicated above in the high-level design and sync the contents on the target web-based applications (Currently 4).
- Mapping functionality between the input file and the target application to match the column header with the target application field.
- Filters to choose only specific set to fields for columns.
- Develop front end for the admin usage.
- Include all store product data fields, product option & metafields.
- 15 days support after final deployment.
